DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Response to Amendment

2. This communication is responsive to the applicant's amendment filed on 07/15/2008 and the RCE filed on 04/28/2008. The applicant(s) amended claims 1-7, 10-11, 15 and 20-21, and cancelled claims 4 and 14 (see the amendment: pages 2-8; also see Examiner's amendment below).

The examiner withdrew the previous claim rejection under 35 USC 112 1st and 2nd, because the applicant amended the corresponding claims.

The examiner withdrew the previous claim rejection under 35 USC 102/103, because the applicant amended the corresponding independent claims **and** the arguments regarding prior art rejection (see Remarks: pages 11-13) are persuasive, which provides the basis for the allowance (see reason for allowance below).

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the applicant's representative, Stanley Ference (33,879), on 07/16/2008 and 07/21/2008. The Examiner's Amendment is as following:

In the claims:

Claim 1, line 1 of the claim, after "An apparatus", insert --for enrollment of a speaker in a speaker verification system--;

line 9 of the claim, replace "being adapted to split" with --by splitting--;

line 10 of the claim, replace "is adapted to determine" with --determines--;

line 13 of the claim, after "occurs independent of", insert --a--;

line 14, after "model", delete "and during the enrollment of a speaker in a speaker verification system".

Claim 2, line 2 of the claim, replace "is adapted to initially split" with --splits--.

Claim 3, line 2 of the claim, replace "is adapted to:" with --:-;

line 3 of the claim, replace "split" with --splits--;

line 4 of the claim, replace "repeat" with --repeats--.

Claim 4, line 2 of the claim, replace "is adapted to determine" with --determines--.

Claim 5, lines 2-3 of the claim, replace "is adapted to determine" with --determines--.

Claim 6, lines 2-3 of the claim, replace “is adapted to determine” with --determines--.

Claim 7, line 2-3 of the claim, replace “is adapted to:” with --:--;

line 4 of the claim, replace “assign” with --assigns--;

line 5 of the claim, replace “yield” with --yields--.

Claim 11, line 1 of the claim, after “A method”, insert --for enrollment of a speaker in a speaker verification system--;

line 12 of the claim, after “model”, delete “and during the enrollment of a speaker in a speaker verification system”.

Claim 21, line 1 of the claim, after “A program storage device readable machine”, insert --for enrollment of a speaker in a speaker verification system--;

line 14 of the claim, after “model”, delete “and during the enrollment of a speaker in a speaker verification system”.

-----End of Examiner's Amendment-----

Allowable Subject Matter

4. Claims 1-3, 5-13 and 15-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent **claims 1, 11 and 21**, the instant application is directed to a apparatus, method and program storage device of clustering of speech and audio data. Each of

the independent claims, combining some well known features in the art, identifies the uniquely distinct features of:

clustering of said speech and audio data;

creating a predetermined number of non-overlapping subsets comprising splitting the input data recursively and determining an eigenvector decomposition relating to the input data;

said clustering being independent of any model wherein the splitting of the input data into a predetermined number of non-overlapping subsets occurs independent of a model;

wherein there is no variability in the clustering due to randomness.

5. The prior art of record, Gao et al. (6,073,096) and Kuhn et al. (6,343,267), provided numerous teachings and technique of clustering and classifying speaker's data, including pre-clustering training speakers acoustically into clusters, class-specific partitioning of the acoustic space in terms of speakers, providing top-down or bottom-up speaker clustering methods using Gaussian log likelihood as distance measure and speaker adaptation algorithms, including maximum likelihood linear regression (MLLR) and maximum a posteriori (MAP) adaptation; providing dimensionality reduction for speaker clustering with HMM, and using maximum likelihood eigenvoice decomposition (MLED) with HMM involving probabilities and eigentransforms. However, the combined features stated above, are not anticipated by, nor made obvious over the prior art of the record.

Art Unit: 2626

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
